Experience

Web Development

Self-Employment | From April to October 2021

Development of applications, from design to page's creation and linking. Working end-to-end in projects.

- UI Designer
- Front-end developer
- Back-end developer
- Build products that meet the needs of customers and target audience.

Computer Information Systems Programmer

42Dias/Symtropy | From November 2021 to present

Full Stack professional, working with all technologies required by company projects, such as: ReactJS, Angular, VueJS, Solidity, PHP, Node, Sequelize, Python, MySQL, PostgreSQL, and even MongoDB. Starting in 2024, I have been serving as a Technical Lead.

- Plan and estimate sprints for agile projects
- Assign tasks
- Manage the testing and development teams
- Prioritize tasks and projects
- Lead the development and quality control teams.
